SUMMARY

Information Technology undergraduate with production experience building mobile, full-stack, and AI-powered applications. Proficient in React Native, React.js, Next.js, Node.js, ASP.NET Core, SQL Server, REST APIs, and RAG systems. Currently developing production software at Eccura Technologies while strengthening Data Structures & Algorithms and core CS fundamentals.

EDUCATION

SRMS College of Engineering & Technology, AKTU **2023 – 2027**
Bachelor of Technology in Information Technology *CGPA: 8.67/10.0*

TECHNICAL SKILLS

Languages: C++, JavaScript, TypeScript, C, SQL **Frontend:** React.js, Next.js, HTML, CSS, Tailwind CSS
Mobile: React Native, Expo, Android Development, API Integration **Backend:** ASP.NET Core, Node.js, Express.js, REST APIs, Authentication
Databases: SQL Server **AI/ML:** LLM Integration, RAG, Semantic Search, Vector Embeddings, Vector Databases, TensorFlow, TensorFlow Lite
CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks **Tools:** Git, GitHub, VS Code, Figma, Postman

EXPERIENCE

Eccura Technologies Pvt. Ltd. **June 2026 – Present**
Android App Developer Intern

- Developed and maintained **2+ cross-platform mobile application modules** using React Native for production software workflows.
- Built **10+ reusable UI components** and integrated **5+ REST API endpoints** for authentication, data retrieval, and backend communication.
- Collaborated on **ASP.NET Core and SQL Server**-based applications, contributing to debugging, testing, and production-oriented software development.

PROJECTS

Joblyt – Android Application Google Play
Published Android Application

- Developed and shipped an Android application as part of a real-world software development workflow during internship.
- Successfully published the application on **Google Play**, demonstrating end-to-end mobile application development and deployment.

Eccura Technologies – Corporate Website Live Website
Production Web Development

- Designed and developed a **production corporate website** showcasing software products, ERP solutions, services, and technology offerings.
- Built a responsive business-focused web experience with optimized product/service presentation across desktop, tablet, and mobile viewports.

Private RAG AI Assistant GitHub
Python, Llama 3, Next.js, Supabase pgvector

- Architected an AI-powered **Retrieval-Augmented Generation** platform enabling contextual conversations over uploaded documents.
- Implemented semantic search, vector embeddings, and **3+ core modules** covering document ingestion, vector search, and AI chat.

QRForge – Universal QR Generator GitHub
React, Vite, JavaScript

- Engineered a QR generation platform supporting **6 formats**: URL, WhatsApp, Email, Phone, Text, and WiFi.
- Created **10+ reusable UI components** with real-time QR generation and download functionality in a responsive SaaS-style web application.
