NISHTHA GUPTA

Mobile & Full-Stack Engineer (React Native & Enterprise APIs)
Bareilly, Uttar Pradesh, India | +91 8218815572 | nishthaagupta01@gmail.com
GitHub | Portfolio | LeetCode | Codolio

SUMMARY

Information Technology undergraduate with hands-on production experience engineering cross-platform mobile architectures and scalable backend solutions. Proficient in building robust mobile components using **React Native & Expo**, designing secure workflows via **ASP.NET Core**, and managing heavy database pipelines with **SQL Server**. Track record of shipping production-ready mobile features and deploying applications directly to the **Google Play Store**.

EDUCATION

SRMS College of Engineering & Technology, AKTU **2023 – 2027**
Bachelor of Technology in Information Technology *CGPA: 8.67/10.0*

TECHNICAL SKILLS

Mobile Engineering: React Native, Expo, Mobile API Integration
Backend & Security: ASP.NET Core, Node.js, Express.js, RESTful APIs
Languages & Databases: TypeScript, JavaScript, C++, MS SQL Server
CS Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Computer Networks
Tools & Workflows: Git, GitHub, Postman (API Testing), Figma UI Translation, Agile/Scrum

EXPERIENCE

Eccura Technologies Pvt. Ltd. **June - Aug 2026**
Android App Developer Intern *Bareilly, UP, India*

- Developed and maintained **2+ cross-platform mobile application modules** using React Native for live production enterprise workflows.
- Built **10+ highly reusable UI components** and integrated **5+ secure REST API endpoints** for user authentication, data synchronization, and state management.
- Collaborated closely on the **ASP.NET Core and SQL Server** backend server layer to debug, optimize, and test data flow pipeline efficiency for client devices.

PROJECTS

Joblyt – Android Application Google Play Store
Lead Mobile Developer | React Native, Expo, Native API Integrations

- Engineered, optimized, and successfully shipped an Android application to the **Google Play Store** using React Native inside a production release cycle.
- Implemented lazy loading rendering and optimized image viewports to ensure high frame rates and quick response states across low-end mobile devices.
- Integrated persistent application caching states to keep the mobile runtime functioning smoothly during intermittent cellular connectivity drops.

Private RAG AI Assistant GitHub
Backend AI Engineer | Next.js, Llama 3, Supabase pgvector

- Architected an enterprise document search platform using Next.js and Llama 3 running atop a high-speed vector storage pipeline.
- Implemented secure contextual semantic search patterns and managed document vector matching mechanisms via Supabase pgvector infrastructure.

QRForge – Universal QR Generator Live Demo
Full-Stack Developer | React, Vite, JavaScript

- Engineered a secure QR processing engine supporting **6 dynamic generation variations** (URL, WhatsApp, Email, Phone, Text, WiFi).
- Created clean component architectures to enable real-time canvas canvas translations and instant local device downloads.
